CAREER OBJECTIVE

Aspiring Computer Science and Engineering graduate seeking a challenging role to apply technical, analytical, and problem-solving skills. Passionate about building scalable software solutions, working with modern technologies, and contributing effectively to team-driven environments while continuously learning and improving.

EDUCATION

Vidya Academy of Science and Technology, Thrissur B.Tech in Computer Science and Engineering (KTU)	2022 – 2026 CGPA: 8.34
Little Flower CGHSS, Guruvayoor, Thrissur Class XII – Computer Science	2020 – 2022 95.9%
L I G H S, Choondal, Thrissur Class X	2019 – 2020 97%

PROJECTS

AUTHENTIC EYE — AI-Generated Image Detection Web Application

Designed and built **AUTHENTIC EYE**, a web application to detect AI-generated images on social media and reduce misinformation. Developed REST APIs using FastAPI to serve a ConvNeXt-Tiny CNN model for binary image classification and built a responsive frontend for image upload and result visualization.

Tech Stack

- Frontend: HTML, Tailwind CSS, JavaScript
- Backend: FastAPI (Python)
- Model: ConvNeXt-Tiny (CNN, PyTorch)

Autonomous Cognitive Engine for Long-Horizon Tasks

Developed a stateful autonomous AI agent using LangGraph to execute complex tasks through structured planning, persistent memory, and multi-step reasoning. Implemented task decomposition, virtual file system-based context management, and agent evaluation using LangSmith.

Tech Stack

- Frontend: Streamlit (Python)
- Backend: Python
- AI/Frameworks: LangGraph, LangChain, LLM APIs
- Tools: LangSmith

CareerCatalyst – AI-Based Campus Placement Platform

Developed an AI-powered full-stack platform for campus placement preparation, career guidance, and job matching. Implemented modules for aptitude, coding, technical, and HR practice with performance tracking dashboards. Integrated features such as resume analysis, job recommendations, career roadmaps, chatbot support, and role-based dashboards using REST APIs.

Tech Stack

- Frontend: HTML, Tailwind CSS, JavaScript
- Backend: Node.js, Express
- Database: MongoDB
- AI: Python, NLP, LLM APIs

INTERNSHIP EXPERIENCE

AIML Intern (Virtual) – Infosys Springboard

- Developed an autonomous AI agent capable of long-horizon task execution using LangGraph.
- Implemented modular task decomposition and memory-based execution strategies.
- Built structured workflows for improved decision-making and execution tracking.
- Analyzed agent performance and optimized workflows using LangSmith evaluation tools.
- View Certificate at https://drive.google.com/file/d/1NKTPVpKibDGJM7UKkgypTk7oXUu_uWrT/view

SKILLS

Technical Skills

- Programming: C, Java, Python (basics)
- Web Development: HTML, CSS, JavaScript ,React,php(basics)
- Backend: Node.js, Express, FastAPI
- Databases: SQL, MongoDB
- AI/ML Basics, REST APIs, OOPS Basics
- Testing: API Testing Postman(basics), SDLC/STLC Basics
- Tools :Git , GitHub

Non-Technical Skills

- Problem-Solving and Analytical Thinking
- Time Management and Adaptability
- Team Collaboration and Communication

CERTIFICATIONS

- Google Cybersecurity Certificate – Coursera
View Certificate
- Artificial Intelligence Primer – Infosys Springboard
- Data Analytics Job Simulation – Deloitte
